### Statement of Need

AANA has determined the need for this live educational activity based on identifying professional practice gaps, previous course evaluations and the AANA Self-Assessment Examination. The educational content of this activity was based upon current issues and topics provided by AANA planning committees and membership.

### Continuing Medical Education/Credit Designation

The Arthroscopy Association of North America is accredited by the Accreditation Council for Continuing Medical Education to provide continuing medical education for physicians.

The Arthroscopy Association of North America designates this live activity for a maximum of 20.00 AMA PRA Category 1 Credits™. Physicians should claim only the credit commensurate with the extent of their participation in the activity.

This activity may also help fulfill the Maintenance of Certification credit requirements mandated by the American Board of Orthopaedic Surgery.

## **Learning Objectives**

- 1) Comprehend the fundamentals of shoulder arthroscopy, including surgical options for rotator cuff tears and shoulder instability.
- 2) Discuss controversies in the field of shoulder surgery, including grafts and patches for rotator cuff repair, superior capsular reconstruction, and bone block procedures for shoulder instability.
- 3) Improved surgical skills of shoulder arthroscopy, specifically in treating massive rotator cuff tears, instability with bone loss, and what to do in the setting of failed previous surgery.
