- ACL Reconstruction
- Revision
- Meniscal Repair
- Meniscal Root Avulsion
- MCL
- Posterolateral Corner
- Osteotomy
- TTO/MPFL Reconstruction
- Cartilage Re-Surfacing
- Meniscal Transplants

“

“Shortly after the SOMOS course, I took care of a patient with traumatic shoulder instability and a rotator cuff tear. I treat instability in the lateral decubitus position and cuff injuries in the beach chair position. As a result of the excellent teaching I got at the SOMOS course, I was able to treat both this patient's injuries in the lateral decubitus position.”

“

I recently did an ACL repair, my first one as an attending. I learned how to do this at the SOMOS course. I am a better surgeon because of the AANA/SOMOS courses.”
