CORE

Comprehensive Orthopaedic Resident & Fellows Education

Maintaining ACGME accreditation is a time-consuming process. Sourcing and producing the education topics required within the ACGME curriculum can be challenging, and without dedicated focus it creates gaps in the fellowship experience.

AANA has created a series of 24 webinars for fellowship programs, **CORE: Comprehensive Orthopaedic Resident & Fellows Education**, for free. The heavy lift has been done for you – finding speakers, scheduling, capturing presentations during a busy year and more. The series also includes the ability to track attendance and completion of activities! These webinars provide content on ACGME-required curriculum through didactic presentations, case examples and discussion of critical papers in the orthopaedic medical literature as well as elucidate the webinar topics, such as:

- Shoulder: Instability, AC Joint, Clavicle
- Basic & Advanced Shoulder Arthroscopy
- Hip Arthroscopy
- Elbow and Wrist
- Foot and Ankle
- Knee Arthroscopy
- Pre-Season Prep, Concussion, Heat Stroke
- The Female Athlete, Pediatrics
- Throwing Issues, Overuse Injuries
- Cartilage Restoration
- Patellofemoral
- Osteotomy
- Non-Orthopaedic e.g., business, social media & marketing, dermatologic issues, nutrition and more
